

Presentation HC Wainwright Mining Conference Nov 30/Dec 1, 2021

Cautionary Notes

Cautionary Note Regarding Forward-Looking Statements

Except for statements of historical fact relating to us, certain statements contained in this presentation constitute forward-looking information, or financial information, or financial information, or financial information") within the meaning of the United States of America laws. Forward-looking information may be contained in this document and our other public filings. Forward-looking information relates to statements concerning our outlook and anticipated events or results and in some cases can be identified by terminology such as "may", "will", "could", "should", "expect", "plan", "anticipate", "believe", "intend", "estimate", "projects", "predict", "potential", "continue" or other similar expressions concerning matters that are not historical facts.

Forward-looking statements in this presentation are based on certain key expectations and assumptions made by us. Although we believe that the expectations and assumptions on which such forward-looking statements are based are reasonable, undue reliance should not be placed on the forward-looking statements because we can give no assurance that they will prove to be correct. Forward-looking statements are subject to various risks and uncertainties which could cause actual results and experience to differ materially from the anticipated results or expectations expressed in this presentation. The key risks and uncertainties include, but are not limited to: local and global political and economic conditions; governmental and regulatory requirements and actions by governmental authorities, including changes in government policy, government ownership requirements, changes in environmental, tax and other laws or regulations and the interpretation thereof; developments with respect to the coronavirus disease ("COVID-19") pandemic, including the duration, severity and scope of the pandemic and potential impacts on mining operations; and other risk factors detailed from time to time in our reports filed with the Securities and Exchange Commission ("SEC").

Forward-looking statements in this presentation include statements concerning, among other things: forecasts; outlook; timing of production; production; production; cost, operating and capital expenditure guidance; our intention to return excess attributable free cash flow to shareholders; the timing and implementation of the dividend policy; or the implementation of any share buyback program or other supplements to the 'Base Dividend'; statements regarding plans or expectations for the declaration of future dividends and the amount thereof; future cash costs and all-in sustaining costs ("AISC") per payable ounce of gold, silver and other metals sold; the prices of gold, silver and other metals; mineral resources, mineral reserves, realization of mineral reserves, and the existence or realization of mineral resource estimates; our ability to discover new areas of mineralization; the timing and extent of capital investment at our operations; the timing of production and production rates for gold, silver and development programs;; current financial resources being sufficient to carry out plans, commitments and business requirements for the next twelve months; movements in commodity prices not impacting the value of any financial instruments; estimated production rates for gold, silver and other metals produced by us; the estimated cost of sustaining cost ("AISC") per approvals; the timing of studies, announcements, and analysis; the timing and extent of capitalized stripping at our operations; teceipt of regulatory approvals; the timing of studies, announcements, and analysis; the toming of construction and produces for gold, silver and thereof; our plans and process facilities; ongoing or future development plans and capital replacement; estimates of expected or anticipated economic returns from our mining projects, including for use for gold, silver and the results of our properties and operations; and all other timing, exploration, development, operational, financial, budgetary, economic, legal, social, enviro

Such forward-looking information and statements are based on a number of material factors and assumptions, including, but not limited in any manner to, those disclosed in any other of our filings, and include: the inherent speculative nature of exploration results; the ability to explore; communications with local stakeholders; maintaining community and governmental relations; status of negotiations of joint ventures; weather conditions at our operations; commodity prices; the ultimate determination of and realization of Mineral Reserves; existence or realization of Mineral Reserves; the development approach; availability and receipt of required approvals, titles, licenses and permits; sufficient working capital to develop and operate the mines and implement development plans; access to adequate services and supplies; foreign currency exchange rates; interest rates; access to capital markets and associated cost of funds; availability of a qualified work force; ability to negotiate, finalize, and execute relevant agreements; lack of legal challenges with respect to our properties; the timing and amount of future production; the ability to meet production, availability of sufficient financing; the ultimate ability to mine, process, and sell mineral products on economically favorable terms; and any and all other timing, exploration, development, operational, financial, budgetary, economic, legal, social, geopolitical factors that may influence future events or conditions. While we consider these factors and assumptions to be reasonable based on information currently available to us, they may prove to be incorrect.

You should not place undue reliance on forward-looking information and statements. Forward-looking information and statements are only predictions based on our current expectations and our projections about future events. Actual results may vary from such forward-looking information for a variety of reasons including, but not limited to, risks and uncertainties disclosed in our filings on our website at <u>www.goldresourcecorp.com</u>, on EDGAR at <u>www.sec.gov</u> and other unforeseen events or circumstances. Other than as required by law, we do not intend, and undertake no obligation to update any forward-looking information to reflect, among other things, new information or future events.

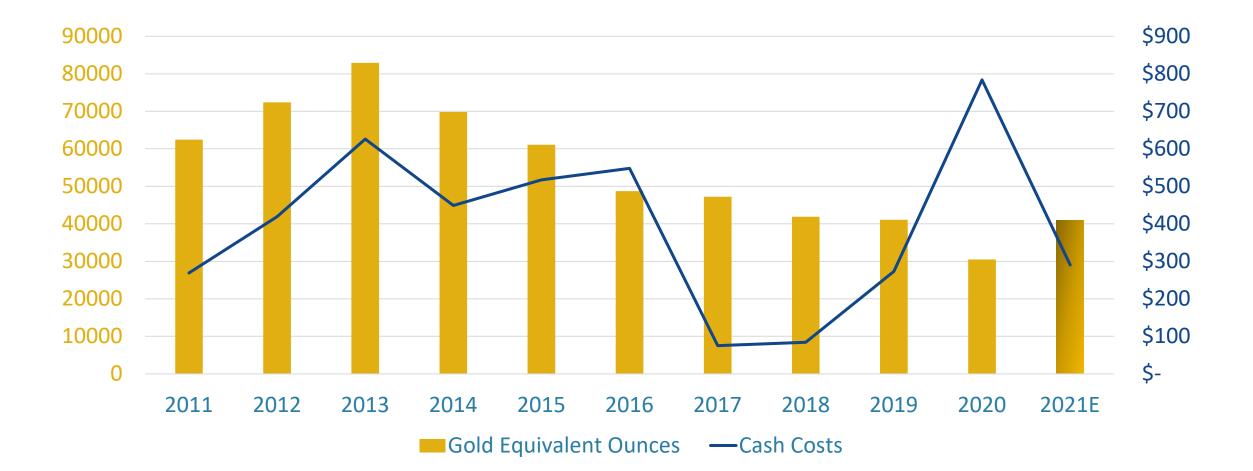

All references to "\$" in this presentation are to U.S. dollars unless otherwise stated

Cautionary Note Regarding Non-GAAP Measures

This presentation includes certain terms or performance measures commonly used in the mining industry that are not defined under the United States of America generally accepted accounting principles ("GAAP"), including free cash flow, cash costs and AISC per payable ounce of gold and silver sold, realized metal prices, earnings before interest, taxes, depreciation and amortization ("EBITDA"), adjusted attributable net income, adjusted basic attributable earnings per share, consolidated cash and consolidated net cash. Non-GAAP measures do not have any standardized meaning prescribed under GAAP and, therefore, they may not be comparable to similar measures employed by other companies. We believe that, in addition to conventional measures prepared in accordance with GAAP, certain investors use this information to evaluate our performance. The data presented is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP.

Effectively a new company with historic production

Total cash cost per gold equivalent ounce are calculated after co-product credits sold and are non-GAAP financial measures. Please see the Non-GAAP Measures section of the Management's Discussion and Analysis and Results of Operations section of the 10-Q prepared for the period ended June 30, 2021 for a complete reconciliation of the non-GAAP measures.

Leadership Team

Allen Palmiere President, Chief Executive Officer, Director

Alex Morrison

Chairman

Kim Perry Chief Financial Officer

Alberto Reyes Chief Operating Officer

Ann Wilkinson Vice President of Investor Relations and Corporate Affairs

Board of Directors

Joe Driscoll Director

Lila Murphy Director

Ron Little Director

Investment Thesis

- Junior precious metals producer with significant base metal credits
- Low-cost production with potential to lower costs further by unlocking value of existing infrastructure
- New, independent board and management focused on disciplined growth
- Strong Balance sheet and cash flow to fund growth
- Consistent dividend payer >\$118M paid over ten years
- Disciplined capital allocation practices
- Organic pipeline of potential development projects from large land position in Mexico and Back Forty Project – acquisition anticipated to close before yearend 2021

Properties – Mexico and Michigan

Production, Development & Exploration Company
Mining friendly jurisdiction
High-grade gold & silver potential

Don David Gold

- Six potential high-grade gold and silver properties 560 square kilometers
- 55-kilometer mineralized structural corridor
 - Arista underground mine

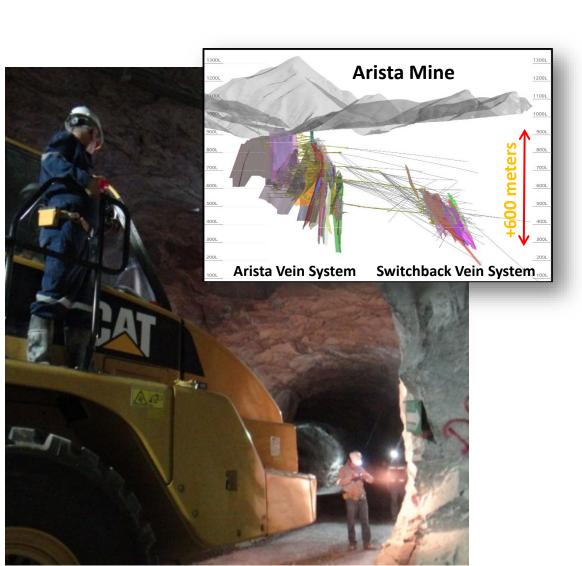

Property / Project	Interest	Exploration	Development	Production
El Aguila	100%	\checkmark	\checkmark	\checkmark
Alta Gracia	100%	\checkmark	\checkmark	\checkmark
Las Margaritas	100%	\checkmark		
El Chamizo	100%	\checkmark		
El Fuego	100%	\checkmark		
El Rey	100%	\checkmark		

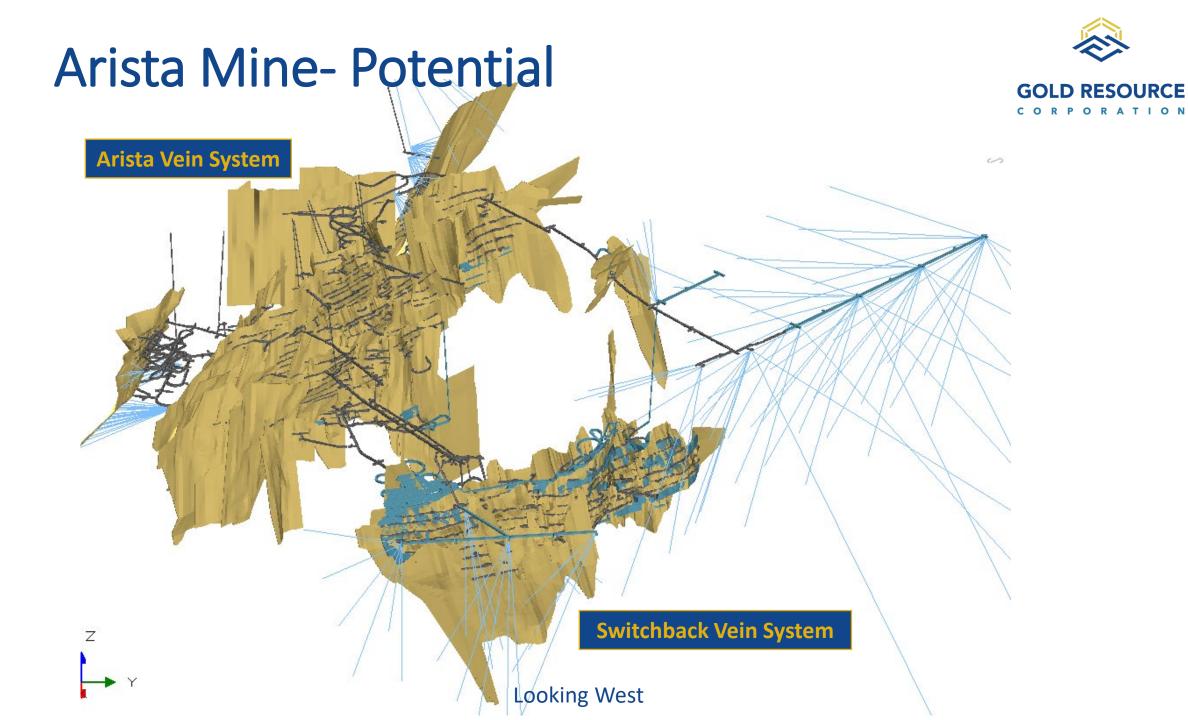

Arista Mine

- Epithermal vein system
 - Intermediate sulfidation
- Large system, en echelon veins
- High-grade gold, silver deposit (polymetallic)
 - Base metals; Cu, Pb, Zn
- Proven & Probable Reserves*
 - 2,328,500 tonnes @ 2.11 g/t Au, 127 g/t Ag, 3.62 g/t AuEq
 - 270,800 oz precious metal AuEq
 - 157,900 oz Au
 - 9,541,700 oz Ag

*Reserve Report Summary in appendix

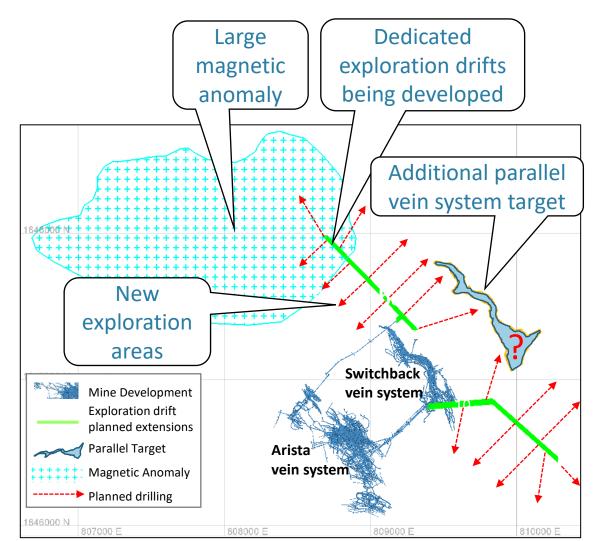

New exploration drifts produce results

- Q2/Q3 drilling confirmed down-dip extension of Switchback vein system
- Intercepts identifying precious and base metal mineralization ~80 meters below mine workings
- Significant gold and silver mineralization intercepted outside existing reserves deeper intersections of Switchback system previously only identified base metal mineralization
- Two infill holes intercepted higher gold grades than modeled

For more information on 2021 drilling please refer to our news releases issued February 2, 2021, August 9, 2021 and September 7, 2021 and available at https://goldresourcecorp.com/news-releases/2021/

Processing plant

- Flexible mill design
 - Two production circuits
- Flotation Circuit (Arista Mine)
 - Nominal ~1,800 tonne/day (t/d)
- Agitated leach circuit*
 - Targeted initial 150 t/d throughput
 - Nominal ~300 t/d ball mill capacity
- 2020 Combined Mill Processing: 1,980 t/d

Acquisition of Aquila's Back Forty Project

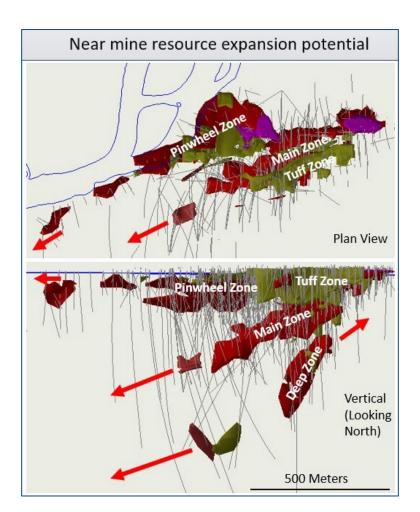

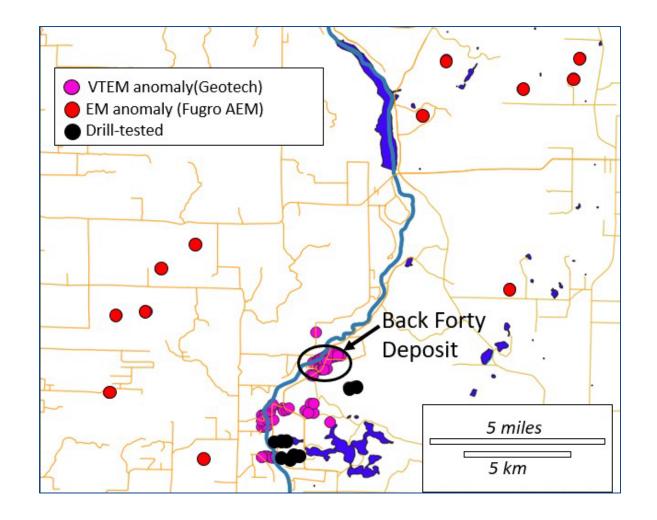

- Accretive transaction in short and medium term
- Purchase price ~ US\$24 million, significant discount to NAV
- Subject to permitting Construction expected to begin early 2024
- Significant mineralized material
- \$95 million invested in exploring and advancing Back Forty Project to date by Aquila and its predecessors

Back Forty - Potential

Benefits of Acquiring Back Forty Project

- Back Forty Project will provide 10+ years of production in the near term
- Gold mineralization increases by ~500%
- Once in production, the grade and profitability of Back Forty are expected to be like the grade and profitability of Don David Gold
- Two mine company with geographic diversification
- Clear path to mid-tier status with anticipated re-rating of GORO stock

Following closing we will

Finalize	 New block models and resource estimates for Back Forty Project
Develop	Revised mine plan
Evaluate	Alternative process flowsheets
Complete	Definitive feasibility study
Review and refine	 Permitting strategy to ensure successful receipt of permits
Expedite	Construction of project

2021 Results Versus Guidance

Measure	YTD 2021	Original Guidance	Revised Guidance
Gold production (oz)	16,525	19,500 – 21,500	21,000 - 23,000
Silver production (oz)	778,776	1,700K – 1,800K	1,100K - 1,300K
Cash Costs after by-products per AuEq ¹ (oz) ^{2,3}	\$535	\$210 - \$225	\$250 - \$290
AISC after by-product credits per AuEq ¹ (oz) ^{2,3}	\$1,090	\$800 - \$900	\$800 - \$900
Capital Expenditures	\$15.2 MM	\$20.0 - \$22.0 MM	\$16.0 MM
Exploration	\$3.7 MM	\$7.0 - \$7.2 MM	\$7.0 - \$7.2 MM
General & Administrative expenses	\$6.0 MM	\$6.0 - \$6.5 MM	\$6.5 - \$6.9 MM

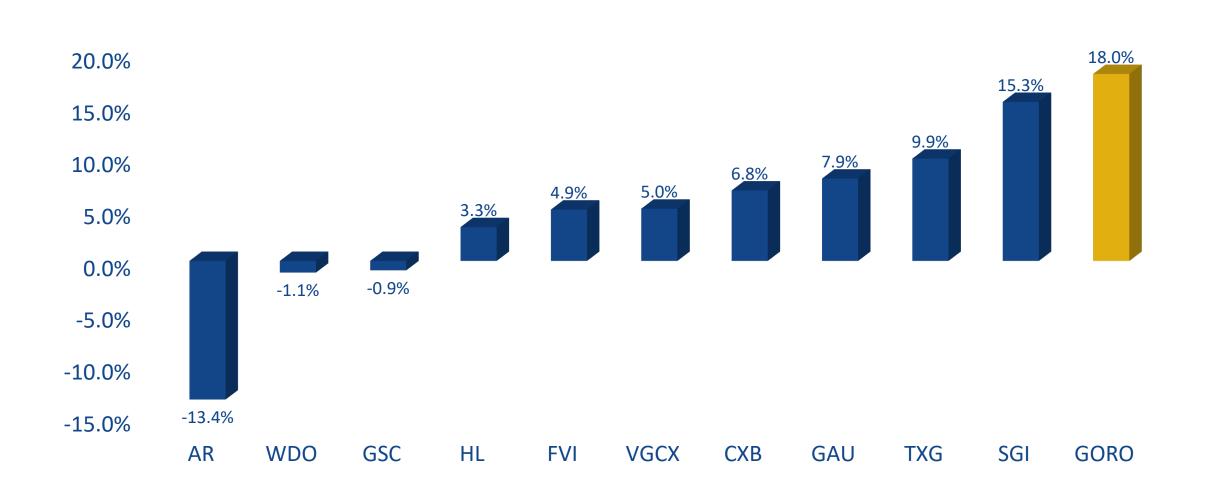

1) Precious metal gold equivalent ("AuEq") is determined by taking gold ounces sold plus silver ounces sold converted to precious metal gold equivalent ounces using the gold to silver average realized price ratio for the period.

2) Calculations of cash cost per after by-product credits per gold equivalent ounce and all-in sustaining cost after by-product credits per gold equivalent ounce are non-GAAP financial measures. Please see the Non-GAAP Measures section of the Management's Discussion and Analysis and Results of Operations in the Quarterly Report for the period ended September 30, 2021, reported on Form 10Q for a complete reconciliation of the non-GAAP measures.

3) Co-product credits are based on approximately 7,200 tonnes of lead sold at an \$0.90 per pound metal price (originally 8,000 tonnes of lead sold at \$0.80 per pound), approximately 1,500 tonnes of copper sold at a \$4.00 per pound metal price (originally 1,800 tonnes of copper sold at \$2.80 per pound) and 16,000 tonnes of zinc sold at a \$1.25 per pound metal price (originally 21,000 tonnes of zinc sold at \$1.04 per pound).

Van Eck Associates Corp.	4,279
Van Eck Associates Corp. The Vanguard Group, Inc.	4,279 3,427

Why Gold Resource Corporation

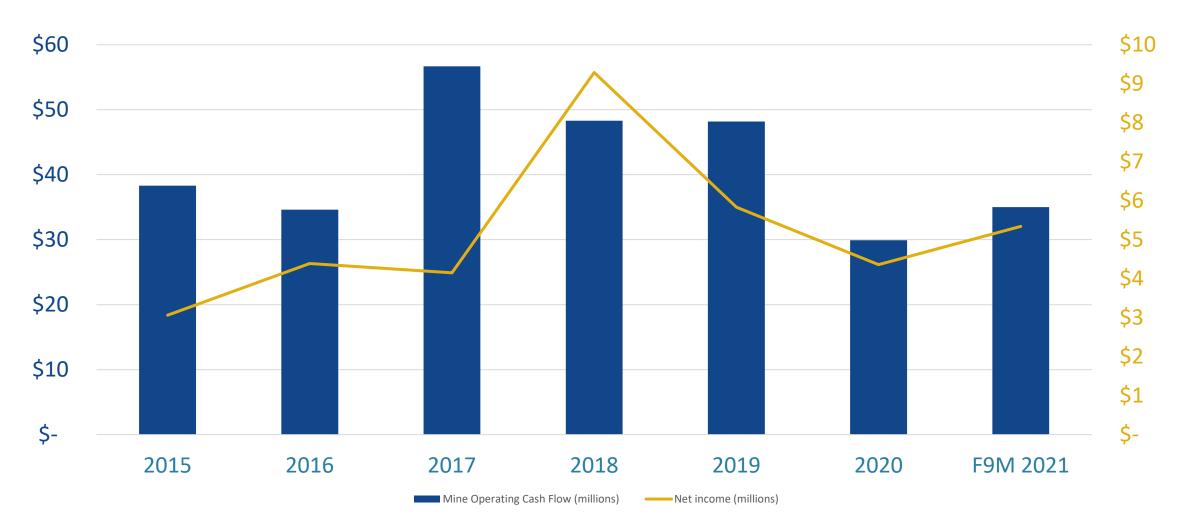

- Peer leading growth profile
- Healthy balance sheet
- Strong cash flow
- Undervalued share price on multiple metrics
 - 5.1 X EBITDA
 - 5.0 X Operating Cash Flow
- Strong technical and operations team combined with leadership possessed of expertise in developing and operating polymetallic open pit and underground mines

Appendices

*Mine gross profit plus depreciation and depletion

Socially Responsible - Health and Safety Focused

Company awarded Mexico's "ESR" seal for seventh

consecutive year

Safety Commissions

First Aid

Fire Brigade

Labor Environment

Protections

Golden Rules

Environmental and Social Initiatives

In addition to costs savings at site, added benefit of power line, completed in 2019, was access to electricity for about 25,000 homes for the first time

Plant Nursery / Reforestation

Dental Clinic Health Clinic

Town Infrastructure

Sustainable Development

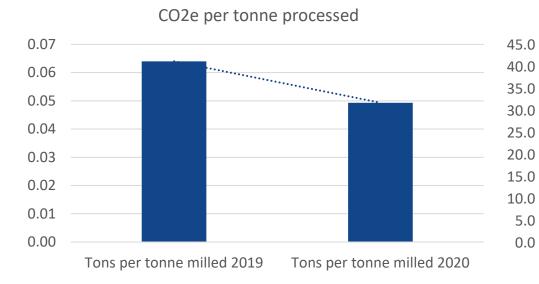

Commitment to Hire

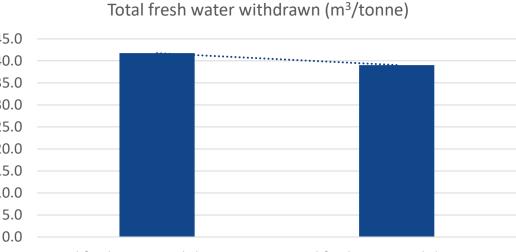

Student Scholarships

Don David Gold Mine Total	2,328,500	2.11	127	3.62	157,900	9,541,700	270,800			

Notes to the 2020 P&P reserves:

Metal prices used for P&P reserves were \$1,477 per ounce of gold, \$17.47 per ounce of silver, \$2.83 per pound of copper, \$0.92 per pound of lead and \$1.17 per pound of zinc. These prices reflect the three-year trailing average prices.

- 1. Precious metal AuEq is 84.54:1 using gold and silver only to calculate gold equivalencies.
- 2. A breakeven Net Smelter Return ("NSR") cutoff grade of \$77 per tonne was used for estimations of P&P reserves at the Arista Mine. The term "cutoff grade" means the lowest NSR value considered economic to process.
- 3. No appreciable amounts of base metals are present in the veins identified to-date at the Mirador Mine at the Alta Gracia project. A breakeven cutoff grade of 2.33 g/t AuEq was used for proven and probable reserves at the Mirador Mine using gold and silver only to calculate gold equivalencies.
- 4. Mining, processing, energy, administrative and smelting/refining costs were based on 2020 actual costs for the Don David Gold Mine.
- 5. Arista Mine metallurgical recovery assumptions used were 76% for gold, 92% for silver, 80% for copper, 79% for lead and 80% for zinc. Mirador Mine metallurgical recovery assumptions used were 85% for gold and 72% for silver. These recoveries reflect 2020 actual average recoveries for the Aguila and Alta Gracia projects.
- 6. P&P reserves are diluted and factored for expected mining recovery.
- 7. Minimum mining width for P&P reserves is 1.5 meters for the Arista and Mirador underground mines.
- 8. Figures in tables are rounded to reflect estimate precision and small differences generated by rounding are not material to estimates.
